

# 円 (yen)

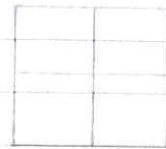

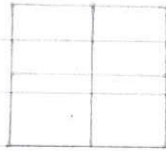

## ① 円ってなに? (What's "yen"?)

円 (yen) is the unit of money in Japan. The Japanese pronunciation of yen is more like "en".

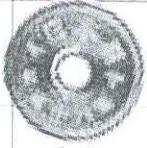

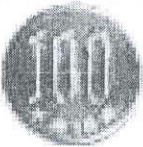

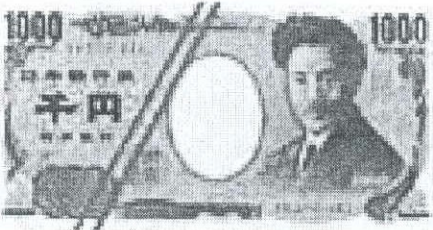

We use a Chinese character (called "Kanji") to write this.

Let's Practice!! →

## ② 円のしるし (Types of yen)

|                                                                                                            | FJD (F\$) | What can we do / buy?                                                                                                                                                                         |
